

JL V&TI METAL

ALLOYS

NiMo30
YS/T 1369-2020

Application

NiMo30 is used as master alloy for the production of titanium alloys

Production method

vacuum induction melting and casting

Quality Material

- a)visual inspection
- b)magnetically separated

Size

turnings or on request

Packaging

In sealed steel drums

Chemical Analysis in wt%

Mo	28.00 - 33.00
Fe	≤0.35
Si	≤0.15
C	≤0.10
Al	≤0.10
O	≤0.35
N	≤0.05
Ni	Balance
