

JL V&TI METAL

ALLOYS

TiMo32

Q/JL-JB14-2021

Application

TiMo32 is used as master alloy for the production of titanium alloys

Production method

vacuum induction melting and casting

Quality Material

- a)visual inspection
- b)magnetically separated

Size

turings or on request

Packaging

In sealed steel drums

Chemical Analysis in wt%

Mo	30.00 - 34.00
Fe	≤0.20
H	≤0.015
C	≤0.08
N	≤0.04
O	≤0.18
Ti	Balance
